

MIDDLE EASTERN
SYSTEMS
NEUROSCIENCE SYMPOSIUM

NOVEMBER
14

UCSD

SAN DIEGO

9:00	Registration and light breakfast	
9:30	Opening remarks	
9:40	Keynote - Nachum Ulanovskiy: Neural codes for natural behaviors in bats	
10:30	Ahmed El Hady: What are foraging models good for?	
11:00	Coffee break	
11:30	Keynote - Athena Akrami: Cross-species study of statistical learning – from behavior to mechanism	
12:20	Farzaneh Najafi: Interval timing signaling, not temporal predictive processing, shapes cell-type-specific dynamics in PPC and V1	
12:50	Gal Atlan: The middle between east and west: a mammalian circuit for using visual feedback to walk straight	
13:00	Lunch!	
14:30	Tahra Eissa: Asymmetries in multi-timescale inference processes	
15:00	Khaled Moussawi: Generalized cue reactivity in dopamine neurons after opioids	
15:30	Shai Berman: Sweet memories: neural representation of taste-memories	
15:40	Data blitz	
16:00	Coffee break	
16:30	Nima Dehghani: Dichotomous dynamics of hippocampal and lateral septum oscillations: state-dependent topology and directional causality during Sleep and wakefulness	
16:55	Lilach Avitan: Brain-wide neural signatures of social approach behavior	
17:25	Shiva Azizpour Lindi: A combination of plasticity rules underlies learning of goal-directed behavior	
17:35	Keynote - Reza Shadmehr : Neurons playing tug-of-war in the cerebellum	
18:05	Closing remarks	
19:00	Cocktails and Dinner
